UNIVERSITY OF TORONTO

FACULTY OF APPLIED SCIENCE AND ENGINEERING

TORONTO, CANADA April 7-1916

President R. A. Falconer

Dear Sir:-

I was told by Professor Angus, that my services here will be dispensed with at the end of present session, and as I intend to look for a lecturing position at other University, I would deem it a great favor, would you kindly please write me a letter testifying to my having been her employee for the last six years.

I beg to apologize for thus troubling you, but since this seems to be the right time to look for similar position, and since I have not been able to see Dean, this seems to be the only course open. Thanking you in advance I am

Yours very respectfully

J T Lagergren

April 8th, 1916

J. T. Lagergren, Esq.,
Lecturer in Machine Design,
Department of Mechanical Engineering,
University of Toronto.

Dear Mr. Lagergren:

I am glad to be able to say that the work that you have done in Machine Design during the six years that you have been on our staff has been quite satisfactory.

Professor Angus reports to me that you know your work, and I have not heard from the students any complaints which would lead me to suppose that it has been other than quite efficient.

Owing to the war we must reduce expenses and make some rearrangements which will involve another kind of appointment and we must endeavour to secure some one who is able to take in addition to the work you are doing work of another kind. I hope that you will soon be able to secure a good position. With kind regards, I am,

Yours sincerely,

President.
